PHONEME-GRAPHEME MAPS

These phoneme-grapheme mapping mats are themed to go along with my Phonics Blending Slides.

To use these effectively, just follow these steps:

1. Read a word aloud and students will move a cube (or other manipulative) to the squares on the mat to represent each sound they hear in the word.
2. Then, students can write the letters that represent each sound on the dotted lines below the squares.
3. Lastly, I like to have students use the blending image (boat, spaceship, ant, etc.) to use a motion and blend the sounds together from left to right to say the word aloud!

You can also turn this into an independent activity by having students follow the same steps, but instead of you saying a word aloud, they will flip a card. All the cards match the exact word lists!

Please note: the cards are separated by subskill (CVC – short a, for example) so you can work on one skill at a time or combine them as needed!
