

# SAY, BUILD, WRITE:

In this digital activity, students will follow three steps:

1. Say – they will say the word aloud (in Seesaw, I encourage them to use the microphone feature so I can hear them say the word later).
2. Build – they will drag over the correct letters in order to build the word.
3. Write – they will write the word on the line (in Seesaw they can use the pen option) or type (in Seesaw they can add text and in Google, the text box is already there).

These are great independent practice activities for students and each unit includes 10 slides.
