PHONICS: WRITE THE ROOM!

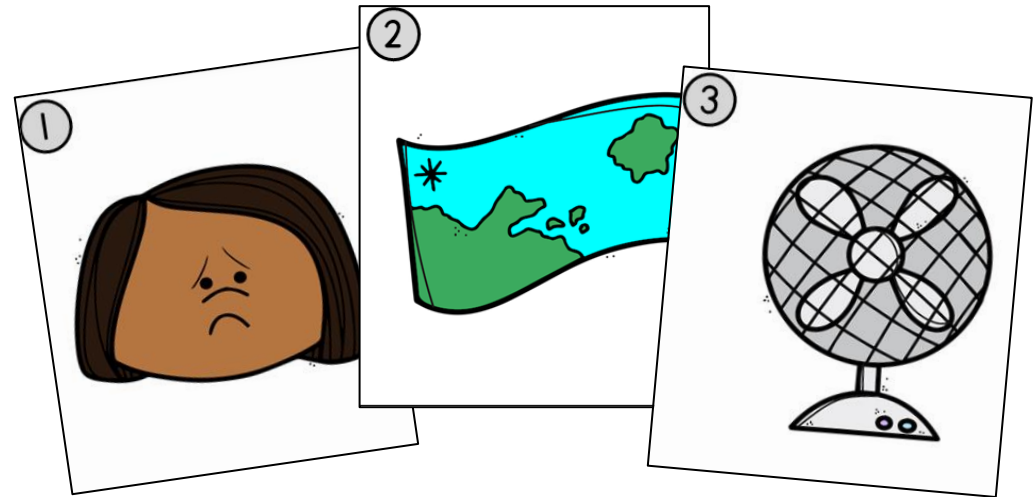

WRITE THE ROOM - DIRECTIONS:

Cut out the image cards and tape them around your classroom! If you laminate these, you'll be able to use them again.

Students will each get their own recording sheet (or one to share with a partner). Students will walk around the room and find each numbered card – they do not have to go in order.

When they find a card, they will look at the picture and tap the sounds in the word. Then, they will write the word to the best of their ability on the matching line on their recording sheet.

Students continue until they find all the images around the room. *I always have students complete this as a silent or whisper-level activity as they walk around the room!*
