

READ & COLOR:

Students can play this game independently or with a partner. Students will use cubes as game pieces, each grab a different color crayon, and start anywhere on the board.

Students will take turns rolling a die, moving that many spaces and reading the word aloud (partner will check them).

Once the student decodes the word, they will find the image in the middle that matches and color it in with their color crayon. Students continue rolling, reading, and coloring until the entire grid is colored in. Whoever has colored in the most spaces, wins!

If a player lands on a word and there are no more of that image, their turn is skipped!

Please note: CVC version shown above

SKILLS INCLUDED:

Below are the skills included for students to review with these board games!
To head to the game, just click below:

<u>CVC 1</u>
